Oh I will. You do not have to be a certain color or gender to be sexist or racist. You can be racist regardless of color. The term "woke" is generally used by the African-American community by the way but people like you throw it around like you understand it and it's meaning, clearly you do not. Thus, your judgement and racism.

Racist and sexist? Really? Please report me to the email manager. Just so you understand half my family is Hispanic and were original settlers of California. When you report me include the entire email string.

Again, you do not have the right to speak to speak to me in this manner and you are being racist and sexist at this point. I am going to terminate this communication and report you to our email manager. You are out of line.

Did I say you couldn't voice your opinion. No. You made it personal. Stop with the woke shit. I'm not trying to silence anybody. Just saying people have different perspectives and circumstances and they do things accordingly. Doesn't make them irresponsible.

Please do not speak with o me this way. I have small children and am entitled to voice this opinion if I chose so. You do not have the right to silence me. That is wrong and uncalled for and not necessary.

Bridget,

I'm sure they had their reasons. People have different perspectives on wild animals. They had good intentions. Leave at that. Judgments aren't necessary.

Thank you for the update. This is very irresponsible considering the animals, people and children in the area.

I just posted this on Nextdoor, but I wanted to be sure and send it out to LJE as well...

I saw someone putting a sign out by the Northaven Trail, and then I noticed that she works for Dallas Animal Services. The sign was a warning about coyotes in the area (this was near the Disney streets). I spoke to her and found out a lot of great information that she asked that I send out on Nextdoor. There are about 6 coyotes in the area. She goes out in the early hours of the morning with a tiny dog (as fake "bait") on a leash and uses something like night-vision goggles in order to try to spot them. The behavior she has seen in the area shows that these coyotes are not yet aggressive. (Over by Peter Pan park, there was one that was a bit aggressive, but he/she is now back to normal).

In speaking with her, I learned that a neighbor in the area was actually inviting one of the baby coyotes to play with his dog!?? The coyote was jumping around and being so fun and playful, so it is now acting like a dog (when she spots it at night) and coming back to find that other dog to play with. Another problem is that there are a few homeowners that are actually leaving food out on their front porch for them???? She said the coyotes are NOT going to starve to death-- they know how to get food, such as cotton tails, rats/mall rodents, and even cats (she said they are trying to pass an ordinance that requires homeowners to keep their cats inside at night). She also said she finds food on the Trail that people are intentionally dropping off for the coyotes. All the above activity is why the coyotes are sticking around this area. She asked that we please STOP doing any of the above.
